HMT330 Series Humidity and Temperature Transmitters for Demanding Humidity Measurement

The Vaisala HUMICAP® Humidity and Temperature Transmitter Series HMT330 is designed for demanding industrial applications where stable measurement and wide customization is important.

Vaisala HUMICAP® Performance

The HMT330 series incorporates Vaisala’s 30 years of experience in industrial humidity measurement. An updated, even more stable and chemical resistant HUMICAP® sensor is available, next to the proven reliable and accurate sensor.

Chemical Purge Minimizes Effects of Contaminants

In environments with high concentrations of chemicals and cleaning agents, chemical purge option helps to maintain measurement accuracy between calibration intervals.

Chemical purge involves heating the sensor to remove harmful chemicals. The function can be initiated manually or programmed to occur at set intervals.

Features/Benefits

- Six models for demanding industrial applications
- Full 0 ... 100 % RH measurement, temperature range up to +180 °C (+356 °F) (depending on model)
- Pressure tolerance up to 100 bar (depending on model)
- Next generation Vaisala HUMICAP® Sensor for excellent accuracy and stability
- Graphical display of measurement trends and over four-year history
- Multilingual user interface
- Excellent performance in harsh chemical concentrations
- Corrosion resistant IP65 housing
- NIST traceable (certificate included)
- Analog outputs, WLAN/LAN
- MODBUS protocol support (RTU/TCP)
Graphical Display of History and Measurement Trends

The HMT330 can be ordered with a large numerical and graphical display, which allows the user to clearly monitor operational data, measurement trends and 1-year measurement history. The optional data logger with real-time clock makes it possible to generate over four years of measured history, and zoom in on any desired time or time frame. The battery backup of the clock guarantees a reliable logging of measured data.

The display alarm allows tracking of any measured parameter, with a freely configurable low and high limit.

Data Collection and (Wireless) Transfer to PC

The recorded measurement data can be viewed on the display or transferred to a PC with Microsoft Windows® software. The transmitter can also be connected to a network with an optional (W)LAN interface, which enables a (wireless) Ethernet connection. A USB-RJ45 cable makes it easy to connect the service port of the HMT330 to a PC.

Flexible Calibration

The HMT330 instruments are calibrated at six humidity points at the factory. A quick, one-point field calibration can be performed with the hand-held HM70 meter. A two-point field calibration can be performed with the HMK15 salt bath calibrator in a controlled environment. The transmitter can be sent to Vaisala for recalibration. Accredited calibrations and maintenance contracts are also available.
### Technical Data

#### Performance

**Relative Humidity**
- **Measurement range**: 0 ... 100 % RH
- **Accuracy** (including non-linearity, hysteresis, and repeatability)
  - with Vaisala HUMICAP® 180 or 180R for typical applications
  - with Vaisala HUMICAP® 180C or 180RC for applications with chemical purge/warmed probe
  - at +15 ... +25 °C (59 ... +77 °F): ±1 %RH (0 ... 90 %)
  - ±1.7 %RH (90 ... 100 %RH)
  - at -20 ... +40 °C (4 ... +104 °F): ±(1.0 + 0.008 x reading) %RH
  - ±(1.5 + 0.015 x reading) %RH
- **Factory calibration uncertainty (+20 °C)**
  - ± 0.6 % RH (0 ... 40 %RH)
  - ± 1.0 % RH (40 ... 97 %RH)
- **Response time (90 %)**
  - at +20 °C (+68 °F): 8 s / 17 s* with grid filter in still air
  - 20 s / 50 s* with grid + steel netting filter
  - 40 s / 60 s* with sintered filter
- **Temperature**
  - Accuracy at +20 °C (+68 °F): ± 0.2 °C (± 0.36 °F)
- **Accuracy over temperature range (measurement range depends on model)**

**Other Variables**
- Dewpoint temperature, mixing ratio, absolute humidity, wet bulb temperature, enthalpy, water vapor pressure

#### Inputs and Outputs

**Operating Voltage**
- 10 ... 35 VDC, 24 VAC
- with optional power supply module 100 ... 240 VAC, 50/60 Hz

**Power Consumption at +20 °C**
- RS-232: max. 25 mA
- U_in 2 x 0 ... 1 V/0 ... 5 V/0 ... 10 V: max. 25 mA
- I_out 2 x 0 ... 20 mA: max. 60 mA
- Display and backlight: + 20 mA
- during chemical purge: max. 110 mA
- during probe heating (HMT337): + 120 mA

**Analog Outputs**
- current output: 0 ... 20 mA, 4 ... 20 mA
- voltage output: 0 ... 1 V, 0 ... 5 V, 0 ... 10 V

**Accuracy of Analog Outputs at +20 °C**
- ±0.05% full scale

**Temperature Dependence of the Analog Outputs**
- ±0.005%/°C full scale

**External Loads**
- current outputs: R_L < 500 ohm
- 0 ... 1 V output: R_L > 2 kohm
- 0 ... 5 V and 0 ... 10 V outputs: R_L > 10 kohm

**Max. Wire Size**
- 0.5 mm² (AWG 20)
- stranded wires recommended

**Relay Outputs**
- 0.5 A, 250 VAC

**Ethernet Interface**
- Supported standards: 10BASE-T, 100BASE-TX
- Connector: 8P8C (RJ45)
- IPv4 Address Assignment: DHCP (automatic), static
- Protocols: Telnet, MODBUS TCP/IP

**WLAN Interface**
- Supported standards: 802.11b
- Antenna Connector Type: RP-SMA
- IPv4 Address Assignment: DHCP (automatic), static
- Protocols: Telnet, MODBUS TCP/IP
- Security: WEP 64/128, WPA2/802.11i

**Authentication / Encryption (WLAN)**
- Open / no encryption
- Open / WEP
- WPA Pre shared key / TKIP
- WPA Pre shared key / CCMP (a.k.a. WPA2)

**Optional Data Logger with Real-time Clock**
- Logged Parameters: max. four with trend/min/max values
- Logging Interval: 10 sec (fixed)
- Max. Logging Period: 4 years 5 months
- Logged Points: 13.7 million points per parameter
- Battery Lifetime: min. 5 years

**Display**
- LCD with backlight, graphic trend display of any parameter

**Menu Languages**
- English, Chinese, Japanese, Spanish, German, French, Swedish, Russian, Finnish

**Mechanics**

- **Cable bushing**: M20 x 1.5 for cable diameter 8 ... 11 mm/0.31 ... 0.43"
- **Conduit fitting**: 1/2" NPT
- **User cable connector (optional)**: M12 series 8-pin (male)
  - option 1: female plug with 5 m (16.4 ft) black cable
  - option 2: female plug with screw terminals
- **Probe cable diameter**:
  - HMT333 (+80 °C): 6.0 mm
  - other probes: 5.5 mm
- **Housing material**: G-AlSi 10 Mg (DIN1725)
- **Housing classification**: IP 65 (NEMA4)

**Operating Environment**

- **Operating temperature**:
  - for probe: same as measurement range
  - for transmitter body: -40 ... +60 °C (-40 ... 140 °F)
  - with display: 0 ... +60 °C (32 ... 140 °F)
- **Electromagnetic compatibility**: Complies with EMC standard EN61326-1, Industrial Environment

**Dimensions**

Dimensions in mm (inches)

- **Transmitter with WLAN antenna**
- **Mounting with Wall Mounting Kit**
- **Mounting with DIN Rail Installation Kit**
- **Pole Installation with Installation Kit for Pole or Pipeline**
- **Mounting Rain Shield with Installation Kit**

**HMT331 Humidity and Temperature Transmitter for Demanding Wall-Mounted Applications**

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT331 is the top-of-the-line wall-mounted transmitter for demanding HVAC and condition monitoring applications. Compared to regular wall-mounted transmitters, the HMT331 offers higher measurement performance, better chemical tolerance, advanced graphical display features, more powering options, more output options and a wider variety of output humidity parameters.

**Features/Benefits**

- For temperatures -40 ... +60 °C (-40 ... +140 °F)
- Application examples: cleanrooms, pharmaceutical processes, greenhouses, swimming halls, museums and archives

**Graphical Display of History and Measurement Trends**

The HMT330 series features a large numerical and graphical display, allowing users to easily monitor operational data, measurement trends and one-year measurement history. The optional data logger with real-time clock makes it possible to generate over four years of measured history, and zoom in on any desired time or time frame.

**Outputs and Power Supply Options for Every Need**

The output options include three analog outputs, RS-232, RS-485, and alarm relays. The voltage supply range is from 10 to 35 VDC. With an additional module, the transmitter can be connected to all universal mains AC supplies. The input/output cable can be fed through the back of the transmitter, which is a useful feature, especially for installations in cleanrooms.
The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT333 is a versatile instrument for applications where a small remote probe is needed.

Flexible Installation
To install the probe in ducts, channels and through walls, an installation kit is available with a stainless steel flange, lead-through piece, and steel support bar.

HMT333 has two probe cable options available, a flexible one that withstands heat up to +80° C, and a durable cable that withstands heat up to +120° C. Both cable options are available in lengths of 2, 5, and 10 meters.

Features/Benefits
- For remote probe installations in demanding HVAC applications
- For temperatures -40 ... +80 °C (-40 ... +176 °F) or -40 ... +120 °C (-40 ... +248 °F)
- Small thermal mass - fast response to temperature changes
- Application examples: cleanrooms, pharmaceutical processes, greenhouses, environmental chambers

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT333 is a versatile instrument for applications where a small remote probe is needed.

For outdoor environments, the DTR502B solar radiation shield provides protection for the probe. The shield can be installed on a pole, a beam or a flat surface.

For Moderate Humidities and Temperatures
The HMT333 is typically used in demanding HVAC applications such as cleanrooms, pharmaceutical processes, and greenhouses, or in processes of moderate temperature. For environments with continuously high humidity, the HMT337 with a warmed, vapor-tight and stainless steel probe is recommended.

HMT334 Humidity and Temperature Transmitter for High Pressure and Vacuum Applications

The HMT334 is ideal for permanent installations into pressurized or vacuum processes.

Features/Benefits

- For pressures up to 100 bar and vacuum applications
- For temperatures -70 ... +180 °C (-94 ... +356 °F)
- ISO and NPT threads available
- Application example: test chambers

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT334 is designed to measure humidity in pressurized spaces or vacuum chambers. Each probe is tested to ensure a gas and vacuum tight installation.

Vaisala HUMICAP® Performance

The HMT334 incorporates Vaisala’s more than 30 years of experience in industrial humidity measurement. The sensor provides accurate and reliable measurement and is immune to particulate contamination and most chemicals.

Technical Data

Temperature measurement range
-70 ... +180 °C (-94 ... +356 °F)
Operating pressure
0 ... 10 MPa (0 ... 100 bar)

Accessories

- Fitting body ISO M22 x 1.5 210697
- Fitting body NPT 1/2" 172225
- PC software + cable 215005
- USB-RJ45 Serial Connection Cable 219685
- Connection cable for HM70 211339
- Wall mounting plate (plastic) 214829
- Pole installation kit 215108
- Rain shield 215109
- DIN rail installation set 215094

Graphical Display of Measurement Trends and Real Time History

The HMT330 series features a numerical and graphical display. The user can easily monitor operational data, measurement trends and up to one-year history.

The optional data logger with real-time clock makes it possible to generate more than four years of measured history, and zoom in on any desired time or time frame.

Using a serial line, the measurement data can be transferred to a PC where it can be further processed and copied to other programs.
The HMT335 has a robust stainless steel probe ideal for high flow rates in hot processes.

Features/Benefits
- For temperatures -70 ... +180 °C (-94 ... +356 °F)
- Long metal probe head
- Stainless steel installation flange available
- Adjustable installation depth
- Application example: hot drying processes

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT335 has a long stainless steel probe designed for high temperatures.

Robust Probe Ideal for High Flow Rates
The HMT335 is ideal for duct measurements as the probe tolerates mechanical stress and withstands high flow rates. The HMT335 can be used, for example, in a hot drying process.

Graphical Display of History and Measurement Trends
The HMT335 features a numerical and graphical display. The user can easily monitor measurement operational data, measurement trends and one-year measurement history.

The optional data logger with real-time clock makes it possible to generate more than four years of measured history, and zoom in on any desired time or time frame.

Vaisala HUMICAP® Performance
The sensor provides accurate and reliable measurement and is immune to particulate contamination and most chemicals.

HMT337 Humidity and Temperature Transmitter for High Humidity Applications

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT337 is delivered in one of three configurations:

- Basic: non-warmed probe for moderate humidities
- With a warmed probe: for near-condensing conditions and dew point measurement
- With a warmed probe and an additional temperature sensor: for near-condensing conditions and relative humidity measurement

True Humidity Readings in Conditions of Condensation

The Vaisala unique warmed probe provides fast and reliable measurement in environments where humidity is near saturation. The warming prevents condensation from forming on the sensor.

As the probe is warmed, the humidity level inside it stays below the ambient level. With accurate temperature measurement, the ambient dewpoint can be calculated precisely.

If the relative humidity value is needed, an additional temperature sensor is used. The measured ambient temperature provides the compensation for calculating relative humidity and other humidity parameters.

Many Ways to Install

A tight installation through a process wall can be achieved with Swagelok® fittings. Meteorological installation kits for outdoor installations and duct installation kits are also available.

Technical Data

| Temperature measurement range | -70 ... +180 °C (-94 ... +356 °F) |

Accessories

- Cable gland and AGRO HMP247CG
- Duct installation kit (RH probe) 210697
- Duct installation kit (T probe) 215003
- Swagelok fittings (NPT and ISO) for both RH and T probes
- Solar radiation shield DTR502B
- Meteorological inst. kit HMT330MIK
- PC software + cable 215005
- USB-RJ45 Serial Connection Cable 219685
- Connection cable for HM70 211339
- Wall mounting plate (plastic) 214829
- Pole installation kit 215108
- Rain shield 215109
- DIN rail installation set 215094

Dimensions

Dimensions in mm (inches)

- ø 12 (0.47)
- 37.5 (1.48)
- 79.5 (3.13)
- 99.5 (3.92)
- 130 (5.12)

Features/Benefits

- For high-humidity applications in industry and meteorology
- Warmed probe for superior performance in condensing environments
- Small, stainless steel, vapor-tight remote probe
- For temperatures -70 ... +180 °C (-94 ... +356 °F)
HMT338 Humidity and Temperature Transmitter for Pressurized Pipelines

The HMT338 is ideal for installations in pressurized processes where the probe needs to be removed while the process is running.

Features/Benefits

- Installed through ball valve – can be inserted and removed while the process is running
- Adjustable probe depth
- Pressure tolerance 40 bar
- For temperatures -70 ... +180 °C (-94 ... +356 °F)
- Two probe lengths available

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT338 is designed for pressurized processes.

Insert or Remove Probe While the Process is Running

With “hot tapping”, the probe is inserted directly into the process while it is running, without the need for venting or lowering the process pressure.

The probe is screwed into a ball valve assembly that has been fixed to the process pipe or wall. The adjustable hex nut is hand-tightened to temporarily hold the probe to the process. Then the probe is pushed down to the appropriate depth. The hex nut is tightened with a wrench to lock the probe in its place. Hot tapping is possible in pressures up to 10 bar.

Graphical Display of History and Measurement Trends

From the display, the user can easily monitor operational data, measurement trends and one-year measurement history.

The optional data logger with real-time clock makes it possible to generate more than four years of measured history, and zoom in on any desired time or time frame. The battery backup of the real-time clock guarantees a reliable logging of measured data.

Vaisala HUMICAP®

The HMT338 incorporates Vaisala’s more than 30 years of experience in industrial humidity measurement. The sensor provides accurate and reliable measurement and is immune to particulate contamination and most chemicals.
