SECTION 1

# ABOUT VM-56

# Overview

---

- The VM-56 is a **groundborne** vibration meter capable of simultaneously calculating the measurement quantities defined by **DIN 45669-1**, **ISO 8041** and other national measurement standards.

# Vibration from..

Transportation such as road, highway, railway, subway, etc.

Construction such as piling work, construction vehicle, tunnel excavator/ shield, demolition work, etc.

Mining such as blasting.

# Vibration causes

- 
- ↪ Reduction of wellbeing and health
    - Annoyance (discomfort)
    - Disturbance (sleep trouble)
  - ↪ Building damage
    - e.g. cracking
  - ↪ Damage to an sensitive equipment
    - e.g. optical microscope or medical equipment

Environmental

# 5 KEYWORDS

Simultaneous  
PPV&VDV

Easy to use

High Quality

Wave recording &  
1/3 octave

Attended, Unattended,  
Live-to-web

- Simultaneous measurement of multiple parameters including PPV and VDV
- Setting menu, store mode and interface are same [with the NL-52](#). It is not necessary for SLM customers to learn the VM-56 operation again
- Very reliable, sufficient functions and long life based on our long experience in the environmental measurement field for more than 50 years.
- Flexible product configuration with waveform recording function and 1/3 octave band analysis function available as optional programs
- Suitable for use in a attending measurement, unattended measurement, unattended (live-to-web)

## Specifications

Applicable standards	DIN 45669-1: 2010-09 (Frequency, Measurement range compliance), SB en beoordelen van trillingen, Deel A: Schade aan gebouwen 2010, Deel B voor personen 2013, ISO 8041: 2005, ISO 8041-1: 2017, CE marking, WE
Measurement functions	Tri-axial simultaneous measurement
Measurement values	
In accordance with DIN	Peak particle velocity $ v _{max}$ (PPV) Dominant frequency $f_{mg}$ (D.F.) Weighted vibration maximum value $KBF_{max}$ Maximum cycle-averaged KBF value $KBFT$
In accordance with ISO	Corrected acceleration effective value $Acc.$ Maximum transient vibration value $MTVV$ Vibration dose value $VDV$ Dominant frequency $f_{mg}$ (D.F.) Weighted vibration value $v_{eff, max}$ Maximum $v_{eff}$ over 30-second cycle $v_{eff, max, 30}$ Displacement (0-p. value) $Disp.$ Combined PPV of 3 axes $PVS$ Time-averaged acceleration $a_{TAV}$ Time-averaged vibration $v_{TAV}$

## SECTION 2

# Standards and regulations

# Main applicable standards

## **DIN 45669-1 : 2010-09**

Measurement of vibration emission  
–Part1

:Vibration meters – Requirements and tests

## **ISO 8041 : 2005, ISO 8041-1 : 2017**

Human response to vibration–  
Measuring instrumentation

# Other standards

## **BS 6472-1**

Guide to evaluation of human exposure to vibration in buildings part 1 : Vibration sources other than blasting

## **BS 6472-2**

Guide to evaluation of human exposure to vibration in buildings part 2 : Blast-induced vibration

## **BS 7385-2**

Evaluation and measurement for vibration in buildings part2. Guide to damage levels from groundborne vibration(4-250Hz)

## **DIN 4150-2**

Structural vibration Part 2: Human exposure to vibration in buildings

## **DIN4150-3**

Structural vibration Part 3: Effects of vibration on structures

SECTION 3

# Features and functions

# Features **and** functions

## High Quality

VM-56 is very reliable and high accuracy  
→ **User's measurement is fully secured**  
→ **This high quality allows use in long-term monitoring such as live-to-web system**

## Easy to Use

Menu setting, Store operation and interface are similar to NL-52  
→ **No need to learn VM-56 operation**  
→ **Can avoid error in setting**

Attended

Unattended online

Unattended offline

# High quality allows use in various scene

---

Attended (Short-term measurement)

Unattended (Long-term measurement/  
Offline)

Live-to-web (Long-term measurement/  
Online)

NL-52

VM-56

Similar menu setting as NL-52

No need to learn VM-56 operation

# The same store mode as NL-52

<b>Date store</b>	Internal memory/SD card -max, 1000 tri-axial data sets -dependent on card capacity <b>Calculation store:</b>
<b>Evaluation values</b>	PPV, D.F., KBFT, Acc., MTVV, VDV, C.F., DISP., PVS., OVER / UNDER

Manual store

<b>Date store</b>	Data stored on SD card  <b>Instantaneous store:</b> (Acc.rms data stored every 100 ms) <b>Calculation store:</b> (Calculation cycle:1s to 24 h) <b>Level trigger store:</b>
<b>Evaluation values</b>	PPV, D.F., KBFT, Acc., MTVV, VDV, C.F., DISP., PVS., OVER / UNDER

Auto store

<b>Date store</b>	Data stored on SD card  Evaluation values are continuously recorded for each store cycle at the set measurement start / stop time.  <b>Instantaneous store:</b> (Acc.rms data stored every 100 ms) <b>Calculation store:</b> (Calculation cycle: 1 s to 24 h) <b>Level trigger store:</b>
<b>Evaluation values</b>	PPV, D.F., KBFT, Acc., MTVV, VDV, C.F., DISP., PVS., OVER / UNDER

Timer Auto store

3 modes (Manual, Auto, Timer Auto), Data format: CSV

# Features **and** functions

## Simultaneous measurement PPV&VDV

- No need to buy 2 instruments/ No need to measure two times
- **Save time & cost reduction**
- **Could be a global standard equipment**

## Tri-axis Compact & Light

- Main unit is just 780g (sensor 450g)
- **Very suitable for attended measurement**
- Tri-axial accelerometer and its mounting option are also RION-made
- **High quality & Reliable**

# Simultaneous measurement of PPV and VDV

Table 1  
Simultaneous measurement capability of VM-56

	Building Damage	Human Exposure
Simultaneously	SBR	SBR
Simultaneously	DIN	DIN
Simultaneously	DIN	ISO

Evaluation value of DIN	Evaluation value of ISO
Peak particle velocity $ v _{\max}$ ( <b>PPV</b> )	Corrected acceleration effective value <b>Acc.</b>
Dominant frequency fmg ( <b>D.F.</b> )	Maximum transient vibration value <b>MTVV</b>
Weighted vibration maximum value <b>KBFT<sub>max</sub></b>	Vibration dose value <b>VDV</b>
Maximum cycle-averaged KBF value <b>KBFT</b>	Crest factor <b>C.F.</b>

Table 2

Comparison to simultaneous measurement capability of  
products by other manufacturers

	Building Damage	Human Exposure	Competitors
Simultaneous measurement supported	SBR	SBR	A French company A Hollandisch company
	DIN	DIN	A Swedish company
	DIN	ISO	A French company A Polish company
Simultaneous measurement not supported	A German company, Danish company, Swiss company and Canadian company		

# Tri-axial a accelerometer

## PV-83D

Our **home-made** sensor PV-83D with level display provides a waterproof IP7.

Rated sensitivity: 60 mV/(m/s<sup>2</sup>)

Tri-axial Frequency range: 0.5 Hz to 315 Hz

Accelerometer Usage temperature range: -20 °C to +60 °C (no condensation)

PV-83D Waterproofing: IPX7 by using integrated cable.

Dimensions and weight: Approx 67 mm (dia.) x 50.5 mm (D), approx. 450 g, cable 1.5m

# On the ground

- Using RION DIN-plate VP-54D, the PV-83D can be installed on the a soft ground such as sand, muddy ground. Covered frequency range:1-100Hz

# On the wall

■ Using RION L-bracket VP-54L, the PV-83D can be installed on the wall

Covered frequency range: 1-40 Hz

# Features **and** functions

## CSV file

CSV data can be opened with excel, so no need to use any special software

→ **Cost reduction**

Rion provide free excel macro for reporting

→ **Easy to use & cost reduction**

Data is stored on SD card

→ **Save time**

## Comparator

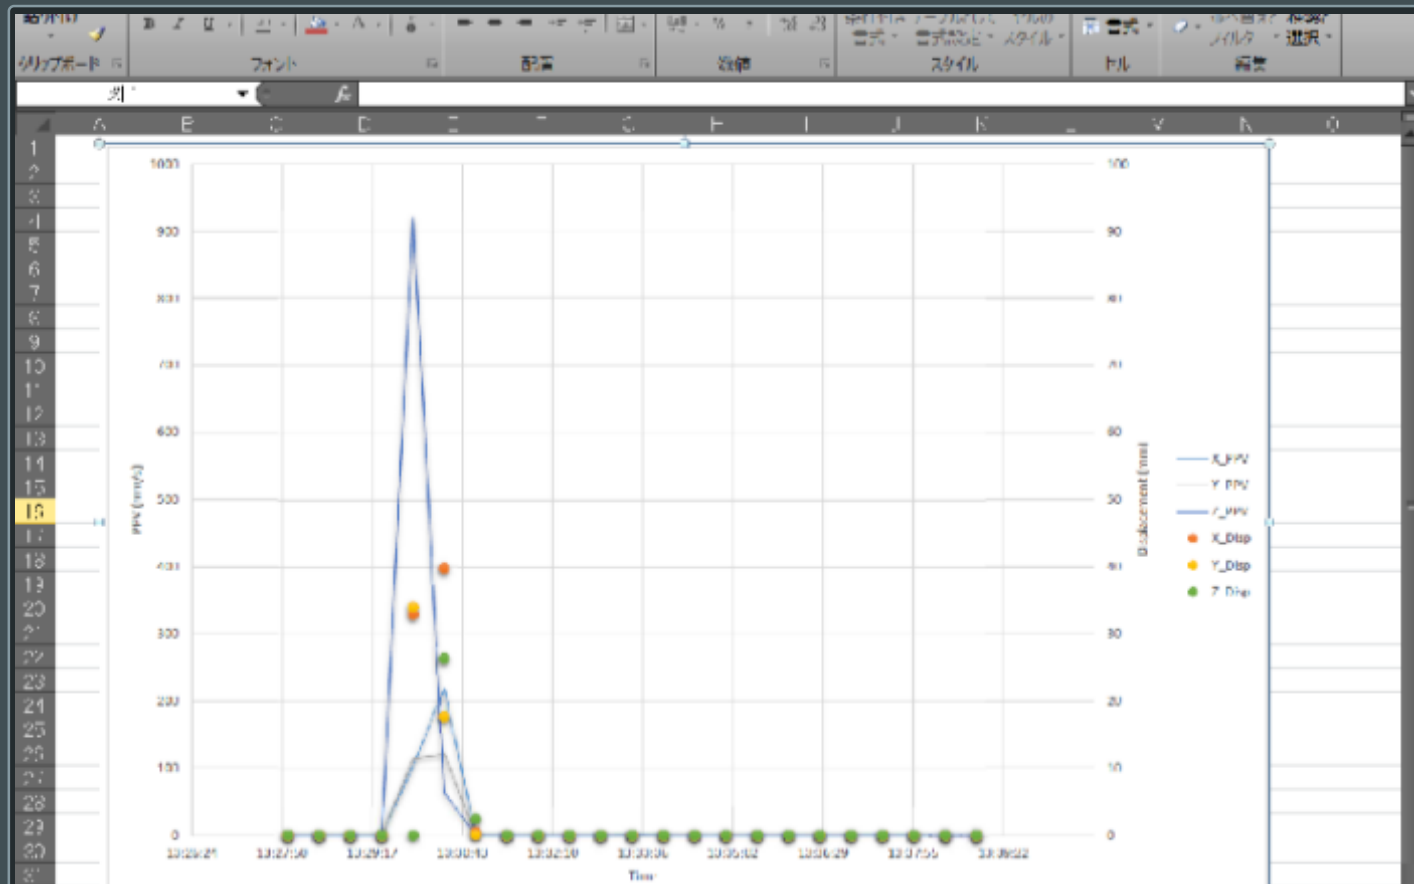

Has real time comparator function conforms to DIN 4150: Part 3 and User can also define own criteria level.

→ **Very flexible, so can be used in local regulations**

Real time comparator output

→ **Can prevent a building damage \***

# Excel macro provided free of charge helps you to make the report

- Data types: VM-56 auto store data, VX-56RT auto store data \*Manual store data are not supported
- Measurement target: PPV, displacement, acceleration (rms), VDV, MTVV, KBF max, veff max. etc.

# Comparator function

When the signal exceeds the limit value, an output signal is activated.

Open-collector output (using I/O port)

Max. applied voltage: 24 V

Max. drive current: 50 mA (with 24 V applied voltage)

Monitored Parameter: PPV (broad-band or user-definable PPV vs frequency)

# Features **and** functions

## Waveform Recording Program VX-56WR

VX-56WR record the raw wave file which is not affected by setting Stored file can be reanalyzed on AS-70GV

→ **User can get right result even if the setting was incorrect, it means the measurement is very Secure**

Frequency analysis is possible

→ **Suitable for designing foundation of structure**

Vibration is hearable

→ **Could be new approach for vibration countermeasure**

## 1/3 Octave Band Analysis Program VX-56RT

1/3 Octave analysis is suitable for countermeasure for vibration emitted by Ground borne. In some countries ISO2631-2 is used for vibration control.

User weighting function of VX-56RT meets that standard.

→ **Provides very Professional & Global solution**

# Waveform Recording Program

## VX-56WR

**VX-56WR** allows recording Waveforms on SD card.

The recording process is carried out simultaneously with the standard

VM-56 functions.

\*Wave data can be analyzed with **AS-70GV** which is released soon.

Max. recording time (at 16 bit)			
Memory card	512 MB	2 GB	32 GB
Sampling frequency			
2 kHz	Approx. 6 hours	Approx. 27 hours	Approx. 470 hours

# Wave data from VX-56WR can be analyzed on AS-70GV

## Waveform Analysis Software AS-70GV

- Allows use of WAV files recorded with VM-56 + VX-56WR for graph display, level processing, frequency analysis (octave band analysis/ FFT analysis), recalculation (PPV, KB, VDV) , and file output.

# 1/3 Octave Band Analysis Program

## VX-56RT

**VX-56RT** enables measurement and logging of 1/3 octave acceleration levels simultaneously with broadband parameters (e.g. PPV, D.F. VDV, MMTV).

Can be used concurrently with VX-56WR.

Stored data can also be displayed on Excel macro.

# Features **and** functions

## Live-to-Web

VM-56 has RS-232C communication and simple command for communication

→ **User can flexibly develop the system with any type of main station.**

VM-56 take the way not to have 3G or 4G module in the unit, because communication technology is advancing quicker than measuring instruments.

→ **Rion hope user continues to use the product for more 10 years. This will require to adopt new communication technologies.**

# Live-to-web system

## Unattended measurement

Wherever you are,  
you get the real  
time vibration  
value.

### Configuration Example for Remote Continuous Monitoring

Using RS232/USB communication port the measurement results and data from the VM-56 can be accessed by computers, tablets or smartphones via a network connection for continuous remote monitoring. (please contact us for further details).

A black and white photograph showing a person's hands holding a handheld electronic device connected to a sensor on the ground. The sensor is a circular unit with a cable extending to the device. The background shows a field with a white mesh fence and trees.

# Specifications

- Directive for safety export:  
CE marking, WEEE directive

- Measurement range

Velocity: 0.03 to 100 mm/s

Acceleration: 0.0003 to 10 m/s<sup>2</sup>

Displacement (0-p): 0.01 to 10 mm (0.5 to 4 Hz)

Weighted vibration amount: 0.02 to 100 mm/s  
(Reference 16 Hz)

Maximum absolute waveform value: 0.05 to 100  
mm/s (Reference 16 Hz)

- Frequency Range

0.5 Hz to 315 Hz

A black and white photograph of a person standing on a paved surface next to a tiled ledge. The person is holding a handheld electronic device in their right hand. A cable connects this device to a small, round, white electronic device resting on the tiled ledge. The background consists of a dense hedge and a building in the distance.

# Specifications

## ■ Communication interface

-USB

SD card recognized as removable disk

Supports command based communication  
(virtual COM port)

-RS-232C

communications Using dedicated cable  
(I/O terminal)

-Comparator output

Open-collector output (using I/O port)

# Specifications

## ■ Power supply

-IEC R6 [size AA] battery x 8  
or external power supply

**AA battery is easy to export and  
chargeable on site!**

-Battery life 24 hours or more, constant  
operation \* Battery life will differ  
depending on settings

-AC adapter  
NC-98 series

A black and white photograph showing a white electronic device, possibly a sensor or data logger, mounted on a wooden post. The device is connected to a cable that runs across the ground. The background consists of a field of tall grass and a concrete curb on the left side.

# Specifications

## ■ Available options

Waveform rec program VX-56WR

1/3 oct band analysis program VX-56RT

Waveform Analysis Software AS-70GV

SD card (512MB, 2 GB and 32 GB)

AC adapter NC-98 Dseries

Extension Cable EC-04 series

BNC to RCA Cable CC-24

Comparator Cable CC-42C

RS-232 Serial I/O Cable CC-42R

L-bracket VP-54L

DIN plate VP-54D
